

Project managements' corner

SuPLight has now passed the first 18 months. The first half of the project has been successful and the project is on its way to have some good results to share with all stakeholders. We are sorry that the Industry Innovation Development (IDG) group-meeting in Stuttgart in the beginning of December had to be cancelled due to too few participants. The IDG will be re-planned and launch again soon.

Follow the project on www.suplight-eu.org

Best regards,
Sverre Gulbrandsen-Dahl, Project coordinator

Founded by the European Commission
SEVENTH FRAMEWORK PROGRAMME:
Call identifier:
FP7-NMP-2010-SMALL-4
Activity code:
NMP-2010-3.1-1: New industrial models
for a sustainable and efficient production

Short notice:

Next SuPLight meeting is planned to take place in Greece in June 2013.

SuPLight Mid-term review and plenary meeting in Stuttgart.

December 5th – 7th all SuPLight partners were gathered in Stuttgart, Germany for a Mid-term review. The review was conducted by the Project Officer and the Project Technical Advisor, representing the EC. The meeting was hosted by the University of Stuttgart.

1. Day: Technical Steering Committee meeting with focus on preparation for the Mid-term Review meeting day 2. The meeting resulted in an internal Mid-term evaluation and a presentation for the Mid-term review.
2. Day: All partners were represented in the Mid-term review meeting. The Project Officer (PO), Sébastien Mortier and the Project Technical Advisor (PTA) Pierre Mereau represented the European Commission in the meeting. All the work in the first project period was presented by many contributors. The PO and PTA asked inspiring and relevant questions and commented on issues that should be included in the future work of SuPLight.
Day 2 also included a General Assembly meeting within the consortium.
3. Day: Plenary meetings for all Work packages were on the agenda for the last day.

In addition the project group managed to learn that Stuttgart got its name from horse breeding, that the city has two castles and that the famous Christmas market is worth a visit.

The project management would like to express their sincere thanks towards all the participants in the SuPLight project. Your contributions and efforts are what make this project a success so far. With these words we would like to wish you all the best for the Christmas holiday and a happy new year.

The SuPLight profile:

Silje Helene
Aschehoug,
Representing
SINTEF Raufoss

Short facts:

PhD in Sustainable Product Development from the Norwegian University of Science and Technology (NTNU) in Trondheim, Norway. MSc. in Safety and Environmental Engineering NTNU.
